

Active Learning Strategies in Face-to-Face Courses > À L > À > Ê ° Ê ^•• Â Ê U Ê / ... i Ê 1 ~ Û i À Ã Î Þ Ê œ v Ê / i Ý > à Ê >

Lecturing, a time-tested and long-venerated teaching method, remains the most frequent method of instruction in higher education throughout the world (Svinicki & McKeachie, 2011; Lambert, 2012, p. 25). It can prove masterful when offered by inspiring teachers who are also gifted orators. But too often students sit passively, disconnected from the lecture, as they actively engage in "facebooking," text messaging, or doing homework for other classes. Lecturing persists, nonetheless, EHFDXVHLW SURYLGHV D FRQYHQLHQW DQG HIÀFLHQW ZD\ WR GHOLYHU content to large numbers of students, particularly in large lecture halls.

Lecturing has advantages. It (1) enables the instructor to supplement the textbook by providing cutting-edge material; (2) gives the instructor presumed "control" in the classroom, although ironically students may not actually be disrupting WKHÁRZRIPDWHULDO EHFDXVHWKH\DUHSDVVLYHRURWKHUZLVH distracted; (3) lets the instructor offer key information that all students are (presumably) exposed to at the same time; and (4) offers an opportunity for an inspiring teacher to stimulate students.

Despite these perceived advantages, a vast number of studies in recent years—particularly in the area of cognitive science, psychology, and neuroscience—provide evidence that the intuitive conclusions of early educators such as John Dewey and many others were clearly on target: Active learning is a crucial element of the new thrust toward what is now commonly cal on BDC /Span <</ActualText (þÿ)>>BDC EMC BT /Span <</MCID 33 >>BDC /TT1 1 Tf 12.5 0 0 12 4 X L] 9 D O X H / L Q H D Q G 6 H Q G 3 D V V D 3 U R E O H P

Q
JÀ sel-Whia@laads to V ... > , whitehatea occurs as a result of i Ý « i À î ã Ndi increases the potential for improved performance and future learning (p. 3)." Prince (2004) further points out that:

In practice, active learning refers to activities elements of active learning are student activity and engagement in the learning process. Active learning is often contrasted to the traditional lecture where students passively receive information from the instructor (p. 1).

Berry (2008) further postulates that four key elements thinking, (2) individual responsibility for learning, (3) LQYROYHPHQW LQ RSHQ HQGHG DFW bbyYaLsWufntativly of BotQvG learning id phthystoplopp oktulusesQ these components, critical thinking can be promoted through KLJKHU RUGHU WKLQNLQJ WDVNV SUblhQslioFobyWworlkGarRictore/worlkcbeffer/whan more passive well-known taxonomy: analysis, synthesis, and evaluation. %URRNÀHOG RFFXUV ZKHQ VWXGHQWV ÀQG WKHLUEVIDDEVIOLE MICHEL BED TWINDERSKUDE I DATE OF THE RED TWINDERSKUDE I DATE OF THE TWINDERSKUDE I DQG VHH DOWHUQDWLYH ZD\V RI DSSinUstrRuttionfroktlleQid sonthe Retground from the literatural the into Watthons WZR HOHPHQWV FDQ EH IRVWHUHG Withfathrep Nachetien Med Abdit North Stripted Steen Aline of Withfathrep Nachetien Nach Stripted St structured group work. As indicated in IDEA Paper No. 38 (Millis, 2002), all four of these key characteristics occur when instructors use cooperative learning. Unlike less structured forms of collaborative learning, cooperative learning requires students to be individually responsible LQGLYLGXDO DFFRXQWDELOLW\ \$ Q \ assessments, self-assessments, and often whole-group assessments to determine individual contributions. Further, group work involves students in open-ended activities that focus on problem solving. Lastly, because cooperative learning is highly structured, the learning activities must be carefully designed and monitored by the professor. As Smith, Sheppard, Johnson, and Johnson (2005) indicate, "engaging students in learning is principally the responsibility of the teacher, who becomes less an imparter of knowledge and more a designer and facilitator of learning experiences and opportunities" (p. 2). Adopting these approaches has enormous pay offs in terms of student learning.

The Value of Active Learning

A meta-analysis of small group learning in the sciences 6FLHQFH >67(0@ E\6SULQJHU 6WDQQH ULJRU group learning are effective in promoting greater academic achievement, more favorable attitudes toward learning, DQG LQFUHDVHG SHUVLVWHQFH programs. A later version of this research reporting the same conclusions appeared in the prestigious i Û î i Ü Ê ce v Ê achievement are only one of the positive results of active `ÕV>Ì^œ~>•Ê(SpringeÀ;\Stanne, & Donovan, 1999).

In a study comparing traditional lecture-based classes with WKRVH WDXJKW XVLQJ DFWLYH OHDUQI (1998, 2002) assembled an impressive data set to assess the effectiveness of alternatives-to-lecture strategies. His study is widely cited, but perhaps the most comprehensiveand clear—explanation for laypersons appears in Nelson WKDW DUH LQWURGXFHG LQWR WKH FODIVHVOUARROPVXRFIDFURLUJHV +DNH·V ÀQG students taught through active group-work methods learned two to three times more than students taught through traditional lecture methods (pp. 122-123).

Prince (2004) also discusses the research evidence for the

effectiveness of active learning: "In summary, considerable support exists for the core elements of active learning. FKDUDFWHUL]H DOO DFWLYH OHDUQLQQJWDUSRSGUXRFDLFQKJHDVFWLYFLLWLWLGFWDG OHFWXL UHFDOO RI LQIRUPDWLRQµ 7KHVH RIOHDUQLQJDFWLYLWLHVE\WKHSUSRUIRHWLVGRHUG7ER\ODLPHOHDFKR17KHUH,6 learning, student-centered approaches to teaching DSSURDFKHVu DOVR HPSKDVLJHV WKDW FULWLFDO WKLQNLQJ ZRUNVWDWLRQV ZKHUH VWXGHQWV FD(Minnesota Active Learning Classrooms (ALCs), for example, feature round worktables seating nine students, enabling them to collaboratively coach one another either directly RU WKURXJK WHFKQRORJ\ 7KHVH FODV IRU WKHLU RZQ OHDUQLQJ 7KHUH DUalfter ObjeR"SJCHALEE-XUSP" (JStulidde Oct 13 eAchte-Acted Wickfund in State of the Acted And the Acted And the Acted And the Acted Acted And the Acted Acted And the Acted A Enviolance of Ushberg Madulate VPvog La@n) YcRn@eytHdesellobled at 1RUWK &DUROLQD 6WDWH 8QLYHUVLW\ (QKDQFHG \$FWLYH /HDUQLQJ FRQFHSW UHWULHYHG RQ 0 DKWWS ZZZZRPO D V V U HGX SURMHFWV \$/&26/LHJQVLIÀHFZDQXWOO &X(and Hill (2012) devote an entire chapter to "Learning Spaces that Support Learner-Centered Curriculum."

the person doing the teaching is far less important than how students are taught and what they are expected to do. In fact, the opening chapter of a new book on learner-centered teaching focuses on getting students to do the work, a recurrent theme (Doyle, 2011). Carl Weiman, a Nobel-winning physicist, found that in nearly identical classes, students learned more from graduate teaching assistants he had 7 H F K Q R O R J \ (Q J L Q H H U L Q thraindeol 6o un3eDinNote HabetinFeDeAlchinFeVmethods (i.e., small group DQG 'GRLQ/RF'X'DV'QV LRQ LQ FFOOXDG/HVGTXL]]HV XVLQJ RQO\VWXGLHVVFUHHQHGIRUVSHFLoÀ\felidkeddsl,"\ddehholm\stationsQ@ndqquestion=briswersessions) 7KHPHWDDQDO\VLVIRXQGWthkanDthNeyYenDrubeldRoxm\attenRubeter,VrighRyl-eshteedneddoprofessor using a lecture-only approach (Haak, HilleRisLambers, Pitre, & Freeman, 2011). Given such value in active learning approaches, faculty should know how to introduce them effectively.

Laying the Groundwork for Active Learning

Before introducing active learning approaches, it is a good idea for teachers to clarify their expectations and to

HPSKDVL]H WKDW WKH DFWLYH OHDUQLQJ DSSURDFKHV XVHG LQ FODVV ZLOO EH UHÁHFWHG LQ WKH WHVWV H[DPV DQG DVVLJQPHQWV &DPHURQ SS 7KH RSWLPXP SODFH WR GR

this is the course syllabus, but the value of active learning approaches must be constantly reinforced. Sadly, some students resist learner-centered teaching approaches. Doyle (2008) explores eight reasons why they might do so and offers ways to counter these negative responses, including

7KH WKLQNLQJ WLPH FDQ DOVR EH VSHQW ZULWLQJ WKH response. After this "wait time," students then turn to partners and share their responses, thus allowing time for both rehearsal and immediate feedback on their ideas (Pair). During the third and last stage, student responses can be shared within learning teams, within larger groups, or within WKH HQWLUH FODVV GXULQJ D IROORZ XS GLVFXVVLRQ 6KDUH 7 K L Q N Pair-Share, like most other cooperative learning structures.
